*Bukytalk Bilgi Teknolojileri A.Ş. Istanbul/Turkey*

## Education

2017-08 – Current

### Computer Engineering

*Akdeniz University – Antalya/Turkey*

## Languages

English

Turkish

## Projects

- **kurumsal.bukytalk.com**

- ❖ A dynamic website was built for BukyTalk using ReactJS. Login page controlled by JWT token.
- ❖ Data was pulled from API with axios. Developed with async components.
- ❖ According to the customer's request, a datagrid template was created with Material UI. Features such as Filtering, Search, ExportCSV, Page are available in DataGrid.
- ❖ Used React Hooks. Such as useState, useEffect etc.
- ❖ Bootstrap library is used as CSS. I have Source Codes in my Github Profile but it is private because the company wants it.

- **API**

- ❖ Developed with NestJS, the NodeJS framework.
- ❖ Swagger UI has been created.
- ❖ Get/Post/Put/Delete requests have been created.
- ❖ PostgreSQL connected to Docker.
- ❖ JWT token was created. (Access Token, Refresh Token)
- ❖ It was developed with TypeScript language.
- ❖ SouceCode is in my Github profile.

- **Elçilik Sistemi Website**

- ❖ An embassy system was built for the BukyTalk company. The purpose of this website is a website where people who earn a fee by adding members to the BukyTalk company can see the wages they earn, the members they add, and the actions of the members they add.
- ❖ Developed with ReactJS.
- ❖ React Hooks, Axios are used.
- ❖ TailwindCSS is used.
